

Make Hun Work as Well as Pay.

STEVENSON, Wash., Oct. 26.—(To the Editor.)—In The Oregonian's Friday paper I read the suggestion that Germany be compelled to pay the debt she owes to civilization, a sum in excess of \$100,000,000,000, and to insure the payment an army to occupy her territory till it is paid.

To me this seems only just, but there should be labor performed in the devastated parts of Belgium and France by German people till the towns are rebuilt, the country made fit for cultivation and these German laborers should be clothed and fed by the German nation.

Why is it that no American women are expressing their opinions on "peace talk"? Have we lost our nerve or are we too weak-kneed to dare back up our boys in their slogan, "To hell with an armistice"?
